

There is a long and winding road leading to this tranquil hideaway home. The homeowners wanted the exterior of the home to be low maintenance. We replaced the siding with Hardie Plank and replaced some of the windows with Pella windows. While we were at it, we replaced the railings on the wrap around porch with TimberTech Radiance Railings and installed new gutters with gutter glove protection system along with custom shutters giving this home an old southern home filled with charm appeal. We replaced the screen on the screen porch with Super Screen which is much more durable, The house looked so good we moved on to the garage. We replaced the garage doors with new Churchill doors.

Then we moved upstairs and transformed the unfinished attic space into a guest suite/office complete with a compact kitchenette. We look forward to seeing you during the Remodelers Home Tour.

DIRECTIONS

From the intersection of US 1 and 440 take Walnut Street to Holly Springs Road. Make a right on Penny Road and a right on Brookridge. Home will be on the left
